

# 5 Money Habits of the Wealthy

These tips come from recent interviews with millionaires about how they have accumulated their wealth.

*How can you make them work for you?*

**Avoid spending money on expensive digs.** Get comfortable in your modest home. You'll pay it off quicker, which means you can then save even more money. Plus, a less pricey home is thriftier to maintain than a mansion.

**Never pay full price for anything.** Shop sales or clearance only. Shop off-season to save even more.

**Refrain from making frivolous expenditures.** You might embarrass yourself if you purchase something unnecessary. Why not spend smartly instead?

**Wear business clothes for business only.** Plan for shirts, suits, and outfits to last 4-5 years. Stick with classic styles and clothing that wears well and requires little ironing.

**Keep cars for 10 years or longer.** Take exceptional care of them inside and out.
